Parasitological studies on laboratory animals fall within the scope of Veterinary Parasitology only if they provide a reasonably close model of a disease of domestic animals.

Additionally the journal will consider papers relating to wildlife species where they may act as disease reservoirs to domestic animals, or as a zoonotic reservoir.

Parasitology  
study of helminth (worm) parasites of domestic and free-ranging mammals and birds. Some parasitologists would include all vertebrate wildlife. Most attention is focused on species with significant impacts on domestic animal, wildlife or human health, and on the well-being of individuals and communities.
