Blacksmith - Wikipedia

Blacksmith, also called smith, craftsman who fabricates objects out of iron by hot and cold forging on an anvil. Blacksmiths who specialized in the forging of shoes for horses were called farriers. The term blacksmith derives from iron, formerly called "black metal," and farrier from the Latin ferrum, "iron."

Blacksmith | metalworker | Britannica

The essence of blacksmithing is not so much strength as control. Yes, you need to "get it hot and hit it hard" sometimes, especially with larger work, but the trick is to hit the metal where you want, as hard as you want as accurately as you want. When I first started working with metal more than a decade ago, my mentor drew an X on the anvil.
