Hi All, Lately I'm getting a strange noise whenever I accelerate even slightly. First I thought of it as a hiss, like a pressure leak or something, but now I would describe it more like a whoosh, kind of like the wind noise you get when driving with a roof rack on, if that makes any sense...

'Whooshing' sound when accelerating (OM651 engine, E220CDI ...

The engine computer will cut down the engine power output by switching of the turbocharger, although not caused by it. In extreme cases, it will even limit the gear selection to one gear and reverse. This is done to prevent any damage to your engine, but also to force you to fix the problem without a delay.
